DETAILED ACTION

1. Applicant's election of group I, claims 13-15, 23-24 and 27 are acknowledged. Claims 16-22, 25-26 and 28 are withdrawn from consideration at this time.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 14-15, 24 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 14-15 and 24 are rendered indefinite because of the term "epoxy-type". Regarding claims 14-15 and 24, the phrase "type" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "type"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 14-15, 23-24 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Marchetti et al., U.S. Patent Number 4,501,787.

Marchetti discloses a woven fibrous glass cloth impregnated with an epoxy resin as per instant claims 15, 24 and 27 (see column 2, lines 38-44). Additionally, the reference discloses that the epoxy resin has an EEW of about 482 (see Example 2). It is disclosed in Example 1 that the woven glass fiber cloth has a weight of 6.0 oz/sq. yd (23 g/m²). Example 2 discloses that the epoxy resin is present in the amount of 77.93% as required by the present claims. The reference does not disclose the density of the product. However, the reference does have the same components and required by the present claims. Therefore, it would be expected that the product of the Marchetti reference have a density between 4 and 2000 kg/m³ as required by present claim 23.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 14-15, 23-24 and 27 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 4, 13-15, and 17-18 of copending Application No. 10/578571. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in both the present and co-pending applications recite an insulation product comprising mineral fibers wherein the fibers have a grammage from 10 to 300 g/m² and at least one of the external faces of the product have a binder present in the amount of 1% by weight.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
